

PFMEA - Common Audit Nonconformities

Major NC & Minor NC Examples | Quality Head Agents

Major NC Examples

1. PFMEA not updated after customer complaint (Clause 8.7.1) | 2. High AP actions open >90 days with no evidence | 3. Process step in PFD not covered in PFMEA | 4. Special characteristics not identified | 5. PFMEA not updated after process change (Clause 8.5.6.1) | 6. S=9/10 item with no detection control | 7. PFMEA not signed off by cross-functional team

Minor NC Examples

1. PFMEA header information incomplete (missing revision date) | 2. Failure mode description vague | 3. Prevention control column empty for some rows | 4. Occurrence rating not consistent with historical data | 5. PFMEA revision date older than 1 year with no review evidence

Objective Evidence Required

1. PFMEA document with header, revision history, sign-off | 2. Action tracking log for H AP items | 3. Evidence of effectiveness verification (Cpk data, records) | 4. Link between PFMEA and Control Plan | 5. PFMEA review meeting minutes | 6. Engineering change records linked to PFMEA updates

Top Auditor Questions

1. Walk me through how you determined this AP rating. 2. What happened to the corrective action for this High AP item? 3. When was this PFMEA last reviewed? 4. Show me how this PFMEA connects to the Control Plan. 5. How do customer complaints get incorporated into your PFMEA?
