

PFMEA Team Competency Matrix

Skill Assessment | Quality Head Agents

Quality Engineer - Required Skills

Write complete PFMEA for assigned process. Rate S/O/D correctly using AIAG-VDA tables. Identify and document AP=H actions with owner and date. Link PFMEA to Control Plan. Conduct PFMEA review meeting. Train operators on PFMEA outcomes.

Quality Manager - Required Skills

All Engineer skills plus: Facilitate cross-functional PFMEA team. Review and approve PFMEA before PPAP. Ensure PFMEA updated after complaints and changes. Present PFMEA status to auditors. Manage PFMEA database and revision control.

Quality Head - Required Skills

All Manager skills plus: Set PFMEA standards for the plant. Approve PFMEA for customer submission. Lead IATF audit preparation for PFMEA. Benchmark PFMEA quality vs industry. Build PFMEA competency across the team.

Assessment Levels

L0 - No knowledge. L1 - Awareness (can explain purpose). L2 - Practitioner (can do with guidance). L3 - Expert (can do independently and train others). L4 - Master (can set standards and audit others).

Annual Competency Assessment

All PFMEA team members assessed annually. Gaps addressed through: Classroom training, e-learning, mentoring, and on-job practice. Competency matrix updated in training records. Evidence kept for IATF audit Clause 7.2.
